DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4,6, and 29 are allowed.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 5 and 7 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claims 5 and 7, the claims fall into this category because they claim a computer algorithm that represents abstract ideas or mathematical algorithms and therefore lacks patentable utility. The features of the invention that would render the claimed subject matter statutory if recited in the claim is to include speech input to the system and how it is measured and converted to the desired data. This would place the claims into a so- called "safe harbor" by requiring a physical act outside a computer (the physical input of speech and subsequent change of physical attributes thereof). Another option would be to add limitations which indicate the practical use of the resultant data in an overall system.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2655

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
